

In Art, your child will learn to;

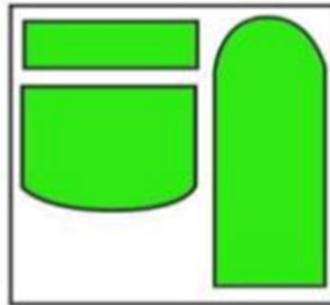

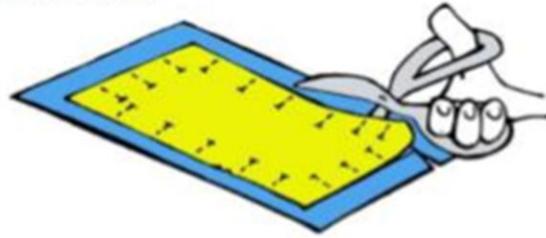

- experiment with paint and materials
- create different textures
- give opinion about a piece of artwork
- say what went well

In DT, your child will learn to;

- Label my design using technical vocabulary
- Create a stuffed toy
- Identify how a product is made
- Can say who design is for and identify how it will be successful
- Know how to thread a needle
- Create a simple running stitch.

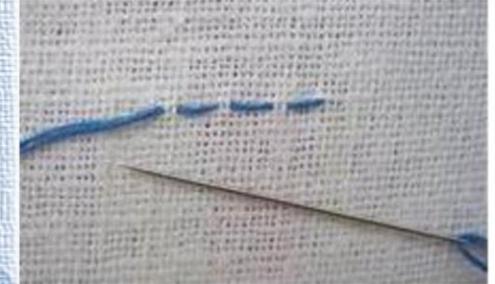

Cutting out techniques

Ensure template is secured to fabric to allow for accuracy. Double sided tape can be used instead of pins to do this.

Place pattern pieces carefully to avoid wastage.

Running Stitch

Making a difference at home

Instead of throwing away clothing with small holes and lost buttons, think about Reuse-Reduce-Recycle and use your new found sewing skills to repair holes in your favourite items of clothing so that you can continue to enjoy wearing them for longer and make a difference to the environment at the same time too!

Paint	

What is painting?

Painting is the art of creating pictures using colours, tones, shapes, lines and textures.

Key Skills we will work on!

- Use different size brushes to make marks.
- Hold my paint brush correctly in order to control my marks.
- Mix primary colours to make secondary colours to match objects that I paint.
- Create a picture by **layering** different colored paint.
- Use black and white to make my colours different tones.

HOW TO CREATE TEXTURE IN PAINTING
